

# ROCKY MOUNTAIN

Single vault, fully accessible.

*\*Shown with Napa Valley rock and horizontal lap wall texture, and cedar shake roof texture.*

The Rocky Mountain single vault toilet building is the cutting edge of precast design with its cast in rock texture. With its steep 7 in 12 pitched simulated shake roof, large cast in windows, and unique cast in rock textures

the Rocky Mountain is the new standard in texture design. The toilet room is designed with a 60" turning radius exclusive of all fixtures, walls and doors. The Rocky Mountain comes with a single 1,000-gallon vault to hold waste.

### **Durability:**

The Rocky Mountain is engineered and designed for long life in extreme conditions. The building meets or exceeds the effects of a Zone-4 earthquake, a 120 mph wind load and a 350 pounds per square foot snow load.

### **Maintenance:**

The Rocky Mountain is extremely easy to maintain. With our steel reinforced 5,000 psi concrete construction, the building and vault will not rot, rust or burn. The building's interior is primed and painted with white paint to reflect natural light from the

Lexan windows mounted in heavy steel frames cast into the walls. Cleaning of the building's interior is easily accomplished with a brush and warm soapy water. The walls and roof structure are made with "colored thru concrete", which are spray coated with an exterior stain, followed by an anti-graffiti sealer.

*Sweet Smelling Technology*

*Meets UFAS, A.D.A. and Title 24 statute of the State of California*

*Vandal resistant building, vault & Toilet Components*

*4" thick steel reinforced concrete walls*

*5" thick steel reinforced concrete roof & floors*

*A 1,000 gallon containment vault holding 15,000 uses*

*Black ABS one piece vault liner with side wall embeds*

*Available in (25) different earthtone colors*

*3 rock texture options with Horizontal Lap and Board & Batt siding texture*

*Cedar shake and ribbed metal exterior roof texture*

### **Vault:**

The waste collecting vault is installed below ground level and is made of 4" thick reinforced concrete. The dimensions of the vault unit matches the perimeter of the building, providing a stable footing structure that supports the full weight of the building. The vault can hold up to 1,000 gallons of waste (15,000 uses) and is sloped, so that waste will drain to the clean out end of the vault. The vault is lined with a black ABS plastic liner which is cast into the side walls of the concrete vault by way of dovetail embeds.

cast concrete walls that look like stone for the first 3 feet and texture horizontal lap or board and batt to the roof. The roof texture is cast to look like cedar shake or ribbed metal.

### **Sweet Smelling Technology**

The building is designed with sweet smelling technology. A black plastic vent pipe, located on the back side of the building, always faces south so that when heated by the sun, the pipe creates a continual air flow through louvered vents located in the building near the floor. The air flows down the riser, through the vault, and finally, up and out of the vent pipe. The positive continual air flow carries the vault air out through

the vent pipe, not through the building, to keep the building odor-free.

### **Quality and Value:**

Because of our two state-of-the-art, 120,000 square foot production facilities, CXT can produce consistently higher quality buildings at a lower cost to meet the needs of city, county, state and federal agencies.

We at CXT take pride in our craftsmanship and are ready to provide you with our legendary customer service. See why we say, "Once you buy a CXT produced building you will never purchase anything else."

### **Special Features**

The building can be shipped in two sections, allowing access to the most remote of sites. Additional features include texture

*\*Shown with Napa Valley rock and horizontal lap wall texture, and cedar shake roof texture.*

### **Wall Textures: Available Options:**

**Lap Siding**

**Board & Batt**

**Napa Valley**

**River Rock**

**Flagstone**

### **Roof Textures: Standard:**

**Cedar Shake**

### **Available Options:**

**Ribbed Metal**

*Also available in 25 different earthtone colors.*
